PROFILE

I am a detail-oriented E-commerce Logistics student with a strong passion for supply chain management and digital logistics. Skilled in data analysis and leveraging information technology to optimize business processes, I bring hands-on experience from academic projects in supply chain and logistics information systems. I am eager to contribute my expertise in driving operational efficiency and delivering innovative solutions.

Academic Project

Designing warehouse layouts   *2023*

Creating an effective warehouse layout design with the specified location constraints and existing environmental conditions using the SketchUp application accompanied by warehouse activity simulations within it using the Flexim application.

Product development with packaging design   *2024*

Develop packaging functions as a marketing method through brand visual communication and enhancing the appeal of local products through innovative packaging design.

Implementing the Odoo ERP system   *2023*

Automating the entire business process by utilizing various ERP modules to manage purchasing, inventory, sales, and marketing.

Designing UI/UX using Figma   *2023*

Designing a web prototype before starting project development using the Figma application for the UI/UX simulation process.

Organizational Experience

Member of the Publication, Design, and Documentation Division in the E-commerce Student Association

2023 - 2024

Responsible for creating design assets for Instagram feed content to enhance program branding and audience engagement.

Internship Experience

Part of Digital and Multimedia Marketing at the Jayamas Bhakti Business Company

2025

responsible for creating simple designs to meet company needs, both in social media, marketplace, etc.
